LOGICO® – Learning with fun and self-checking...

at kindergarten

- Children learn basic skills in a playful way
- Supports communication and language development
- Training of motor skills by moving the colored buttons

at school

- Ideal for independent learning activities
- Learning cards for all major school subjects
- For all levels in regular lessons and support classes

at home

- For reinforcement and rehearsal
- For learning individually or together
- Highly motivational

This is how it works:

1 Place the card into the slot so you can see the questions.

2 Answer the questions and move the colored buttons to the correct answers on the right.

3 Turn the card over and place it in the slot again to check the answers. Your answers are correct if the color codes match.

For every age group, there is the right version.

LOGICO® – A story of success

Teachers, principals and ministries of education in many countries recommend LOGICO. Over the years it has received several awards.

Recent Review

Enjoyable for Children—We found that the children genuinely enjoyed playing and learning with the LOGICO PRIMO. They loved its toy-like appearance—it truly feels like a toy with its bright coloured, chunky buttons to move. They were also engaged by the interesting topics and lovely illustrations. The activities are short, snappy and fun and keep a young child's attention. We also noticed the children had a real sense of satisfaction and pride when they completed each card correctly—great for building confidence in learning.
